### Editorial

The award to the experts who have made outstanding contributions to advancing in [Diabetes](#), Endocrinology and Healthcare. On behalf of the Board of the Journal of Clinical and Medical Case Studies and my co-editors, I am glad to present the Volume 4 of the journal published in the scheduled time. The journal established in December 2016 is now in the process publishing its 5th volume; two issues in a year (Bi-yearly Issue). It is now in the process of getting indexed in Directory of Open Access Journals and also by different academic forums. All these are promising signs. We could only reach this stage through the constant support of Board Members (Prof. Toru Ishikawa and Prof. Antoni Lluca) and intellectual generosity of the readers and contributors (authors and reviewers). One of the objectives of this journal is to encourage publication from different streams of research that helps to enrich further the discourse on Medical science researches. Readers can particularly notice progress made in this direction through the double blind peer Reviews which is emerging as an important section of this journal.

I take this opportunity to thank the authors/publishers for sending their manuscript for review and excellent researches. Below is the list of scope of Journal of to be considered for various modalities:

- Obstetrics and Gynecology
- Oncology
- Clinical Trial
- Endocrinology and related medical research

In the future we hope that such papers will come instead to this Bi-yearly Issue Journal. We also hope that authors in other countries, whose work lies in our chosen field, will continue to find this journal a suitable vehicle for their discoveries. The subject-matter of our journal will continue to be varied, since we interpret the word “Medical” in the widest sense. I envisage in the immediate future a great extension of the Clinical and medical researches, and we shall particularly welcome papers resulting from work in this field. I am sure with their efforts the journal will be able to strengthen the links between bioinformatics and computational biology and others streams within health technology. Initially we started this Journal of Clinical and Medical Case Studies with the aim to disseminate advanced knowledge all over the globe. Thankfully, with the steady support of Eminent Editorial Board Members, Potential Reviewers and Active Authors we are able to run this journal so effectively till now and we hope it continues in near future also.

A heartfelt thank to all the Authors, Editorials and Review board who have been filling in as scaffold for the progression of Journal by effectively taking an interest in survey process along with the Official Editorial Committee.
