“10th International Conference on Medical Education and Health Sciences”, **April 6-7, 2020 Manila, Philippines** which will entail lively debates, Oral talks, prompt keynote presentations, workshops, Poster presentations and networking opportunities around a core of plenary and concurrent sessions based on pivotal issues in the Healthcare sector.

Medical Education Summit 2020 is a forum to explore issues of mutual concern as well as exchange knowledge, ideas and share evidence and generate solutions. The focus of Medical Education Summit 2020 is to present analysis findings, discuss analysis methodology, policy problems, build and maintain essential networks between researchers, practitioners, policy manufacturers and representatives of consumer organizations. Medical Education Summit 2020 works with the theme “The Future of Medical Education” aims to discover advances in health practice, management and education in relation to health disparities as well as a breadth of other topics. Patients with access to a regular health and medical professionals have lower overall health care costs than those without one, and health outcomes improve.

The global market for medical education has a handful of players such as Apollo Hospitals, TACT Academy for Clinical Training, Zimmer Biomet Holdings, Inc. (Zimmer Institute), Olympus Corporation, Gundersen Health System, GE Healthcare, and Medical Training College. Transparency Market Research identifies Apollo Hospitals as the leading contributor to the growth of the overall market owing to its extensive course portfolio, strong market penetration in countries in Asia Pacific, and vast scope for practical hospital experience.

All clinical cases ought to be according in an exceedingly method that give proof that adequate steps are taken to reduce damage, to avoid coercion or exploitation, to safeguard confidentiality, to reduce the danger of physical and psychological harm, and to respect autonomy. The health care industry is one of the world's largest and fastestgrowing industries. The health care industry has several sectors that are dedicated to provide health care services and products. A well-functioning health care system consists of a good financing mechanism, well-trained and adequately-paid workforce, reliable information upon which base decisions and policies are made, and well maintained facilities and logistics to deliver quality medicines and technologies which are very much essential, according to the World Health Organization.

Global health care expenditures are expected to continue to rise as spending is projected to increase at an annual rate of 5.4 percent between 2017-2022, from USD \$7.724 trillion to USD \$10.059 trillion. The emergence of personalized medicine, increased use of exponential technologies, and entry of disruptive and non-traditional competitors, the demand for expanded care delivery sites, and revamped payment and public funding models are all impacting the financial performance of the health care ecosystem. The health care market is looking to health technology for help, along with mergers, acquisitions, and partnerships. Stakeholders are also exploring alternative revenue sources such as vertical integration. Will approaches to well-being hold financial answers for the future?

Health care is the maintenance or improvement of health via the diagnosis, treatment, and prevention of disease, illness, injury, and other physical and mental impairments in human beings. Health care is delivered by health professionals in allied health professions, chiropractic, physicians, physician associates, dentistry, midwifery, nursing, medicine, optometry, pharmacy, psychology, and other health professions. It incorporates the work done in giving essential care, optional care, and tertiary care, and also in general public health. Health Technology is characterized as the use of composed information and abilities as gadgets, pharmaceuticals, antibodies, strategies and frameworks created to take care of a health issue and enhance nature of lives. This incorporates the pharmaceuticals, gadgets, methodology and hierarchical frameworks utilized as a part of medicinal services. The healthcare industry is developing at a quick pace and experiencing some of its most noteworthy changes as the utilization of electronic health records increment.
