ABSTRACT

I see underprivileged has hunger for kissing joy with similar knowledge. The non-scientific people to check with genetic testing to eradicate hollow place of neurodegenerative third DNA for work and what can learn. Thinking about having genome sequenced. Indian people has misleading story about kissing to one another. Great deal with teeth is all about long term results. Researcher initiates the first kiss? Should you close eyes when kiss? To tilt or not to? Laboratory result has given some helpful pointers on how to kiss right.

Note*: Data science is non-clinical and colour of skin, genome sequenced was unknown.
