Conference Series LLC Ltd organizes a Conference Series of 3000+ Global Events with over 1000+ Conferences, 1000+ Symposiums and 1000+ Workshops in USA, Europe, and Middle East & Asia pacific with support from 1000 more Scientific Societies and publishes 700+ Open access Journals which contains over 30000 eminent personalities, reputed scientists as editorial board members.

Market research

The food and drink industry is the largest manufacturing sector in the EU in terms of turnover, value added and employment. It is the second leading manufacturing sector in terms of number of company. Germany, France, Italy, UK and Spain are the largest EU food and drink producers. Every year, the EU food and drink industry export products worth around €65.3 billion.

Global Importance

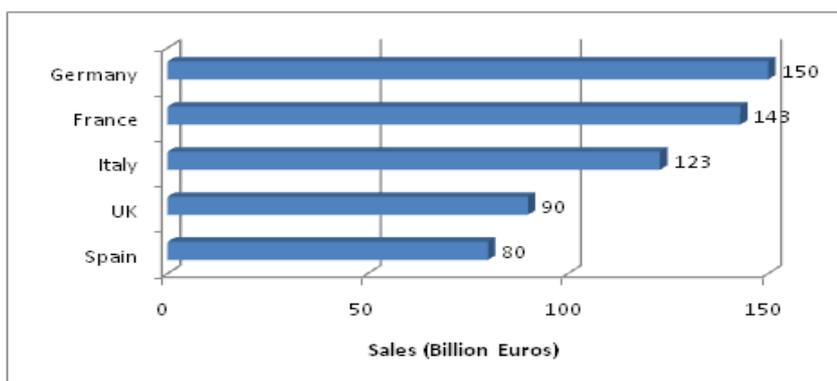

In developing countries, where agriculture dominates all other economic sectors, the majority of workers supporting the food and beverage industry cannot satisfy their immediate consumption needs and earn sufficient income to improve their lives. A handful of pioneering firms are breaking this dilemma and building economic opportunity around food and beverage value chains in ways that support future business growth.

Major food and beverage firms are concerned about maintaining access to quality ingredients. Global consumers are increasingly willing to pay premiums for safe, organic, and sustainable products. In this equation lies the opportunity for large companies to anticipate the needs of consumers, improve lives, and mitigate their environmental footprints.

Pioneering food and beverage firms are partnering with non-profits and public institutions to expand economic opportunities in developing countries at three levels: creating business models that involve the poor as entrepreneurs, suppliers, retailers, customers; building the poor's human and physical capital to enable them to participate in these models; and tackling institutional and policy barriers to enhance feasibility and impact.

These companies are applying five best practice ingredients in their interventions: collaborating across sectors to raise awareness of opportunities; leveraging “patient capital” funding when competitive returns are not immediately available; planning with economic and environmental sustainability in mind; balancing globally and locally focused approaches to economic opportunity creation; and designing for scale and replication to increase impact.

Food and Beverages industry in EU manufacturing Sector

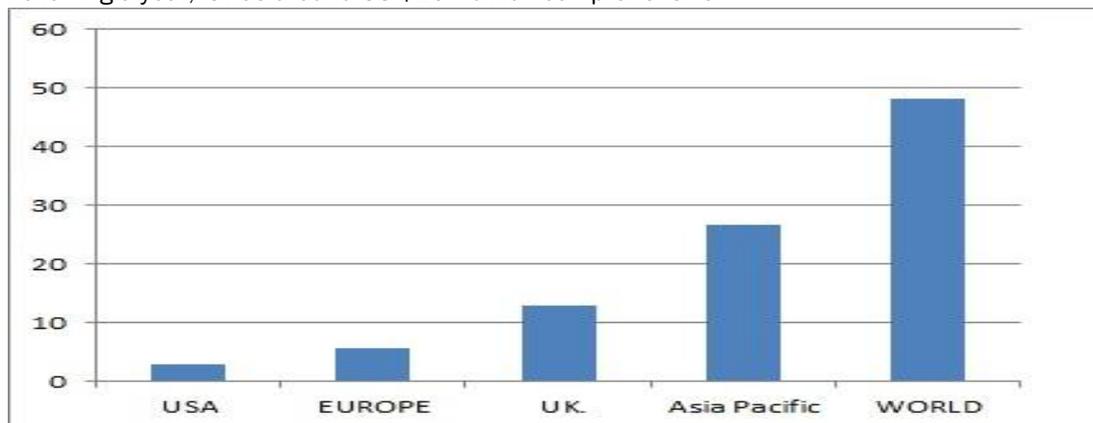

Global Market Size:

The global food and beverage retail industry has witnessed significant growth over the last five years and is expected to continue its growth momentum, reaching approximately US \$5,776 billion in 2017 with a CAGR of 5% over the next five years. Macroeconomic factors such as burgeoning GDP, increasing consumer spending and changing lifestyle, taste, and preferences are expected to drive the industry over the forecast period. The roughly 4.5 billion low-income people in developing countries collectively spend more than \$5 trillion a year. Indeed, the lower consumption segments spend more than the middle and higher consumption segments combined. They spend \$2.3 trillion a year on food and beverages alone.

A Glance at Market of Food Technology

All through the last ten to fifteen years, bargains in the overall [Nutrition](#) supplements advertise have seen a marvellous spike. This has enabled different new players to wander into the business segment with things that assurance to be the solution for youth, prosperity, and vitality. As shown by the evaluations of the Nutrition Business Journal report, the overall Nutrition and supplements advertise stayed at US \$96 billion beginning 2012. Following a year, it was around US \$104 billion comprehensive.
