

Some Case Vignettes on Depression, Substance Misuse and Adult ADHD

Luqman Khan

NHS, UK

Short Communication

Abstract

The rest would have been history. He completed his higher training in Psychiatry in General Adult and Forensic Psychiatry with an Endorsement in Addiction Psychiatry. He has extensive experience in dealing with serious criminal offences with the background of mental illness and its 'diversion' into health (secure psychiatric settings) and Rehabilitation. In addition, issues with a wide variety of mental illness, including what used to be called Learning Disability (now Intellectual Disability) Recently he has developed interests in Adult ADHD and is the joint lead in Scotland for UKAAN (<https://www.ukaan.org/>) United Kingdom Adult ADHD Network. He currently works at Surehaven Glasgow(<https://surehaven.co.uk/drumchapel-hospital/>) , a low secure Hospital in Scotland's largest city; as a locum Psychiatrist doing 3 sessions a week at Midpark Hospital (https://www.nhs.uk/Hospitals/Midpark_Hospital), In the Dumfries and Galloway area of Scotland. He also covers as a Clinical Lead for Abbeycare Scotland, an ad hoc post providing advice, assessments, Nurse supervision (<https://www.abbeycarefoundation.com/rehab-scotland/>) Today he just wants to have a chat. Perhaps even talk about film and books.

Biography

Dr Luqman Khan began life as an aspiring Surgeon (after the baby stage!) After completing his medical Degree at Manchester University (UK), he pursued a career in Otolaryngology (Ear Nose and Throat Surgery). After completing the post graduate exam (or Fellowship i.e the FRCS(Glasg) and being offered a research post on Cochlear Implantation) he sneaked off to an interview on a Psychiatry job.
