Research & Reviews: Journal of Chemistry is the most preferred and highly accessed journal in the field of chemical. RRJC functions on principles of scientific excellence, publication ethics and transparency. It makes mediatory that every article is submitted only through the online manuscript submission and review system. Research & Reviews: Journal of Chemistry with ISSN: 2319-9849 is successfully running since 2012. It is our grate privilege that the journal had published 09 volumes with 6 regular issues in the year 2020. Journal of Chemistry during this year also brought out with many conference and webinars which consisted of more than 50 abstracts. All the articles published in the journal will be abstracted/ indexed in Open J Gate, Academic Keys, Research Bible, CiteFactor, Cosmos IF, Electronic Journals Library, RefSeek, Hamdard University, IndianScience.in, Scholarsteer, International Innovative Journal Impact Factor (IJIF), International Institute of Organised Research (I2OR), Cosmos, Geneva Foundation for Medical Education and Research Secret Search Engine Labs. Studies receiving funding from a funding organization that is included on the list of PMC and Research Funder Policies or authors having NIH grant were submitted to PubMed During the calendar year of 2020, Journal of chemistry received a total of 50 manuscript, out of which 20 articles were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. During 2020 around 30 articles were subjected for publication after they are accepted in the peer review process. Articles were published from researchers all around the world. Globally articles have been accessed by the research scientists and also cited.

Journal of chemistry is now coming with the Upcoming volume 10 in 2021. In this volume the journal is mainly focus more on the current topics of Chemical Biophysics, Analytical Technique, Separation Techniques, Spectroscopy and types, Physical Chemistry, Organic Chemistry, Analytical Chemistry, Synthetic Chemistry, Photochemistry, Computational and theoretical, Polymer Chemistry, Crystal chemistry, Soil Chemistry, Industrial Chemistry, Chemical Analysis. As the current industries and research labs are mainly focusing in gathering effort from academia, Chemical companies, international organizations, as well as governments and philanthropic associations to improve our comprehension of the infection by utilizing a few methodologies. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board, the office bearers for their support in bringing out yet another volume of Research & Reviews: Journal of Chemistry and look forward to their unrelenting support to bring out the Volume 10 of Research & Reviews: Journal of Chemistry in scheduled time.
