

2020 Announcement of Applied Nanotechnology Summit China

Conference Announcement 2020

[Nanotechnology Summit 2020](#) bring together all the International communities (students, scientists, engineers and stakeholders from academia, government laboratories, industry and other organisations) working in the field of Nano scale science and technology to discuss new and exciting advances in the field. This conference will also provide an ideal environment to develop new collaborations and meet experts on the fundamentals, applications, and products of the mentioned fields.

Nanotechnology Summit 2020 invites all the participants from all over the world to attend [Applied Nanotechnology Summit China](#) which is going to be held at Beijing, China during November 18-19, 2020 which includes prompt keynote presentations, Oral talks, Poster presentations and Exhibitions.

Nanotechnology Summit 2019 witnessed an amalgamation of peerless speakers who enlightened the crowd with their knowledge and confabulated on various new-fangled topics related to the field of nanotechnology with namely Wolfgang Ensinger, Technische Universitaet Darmstadt, Germany

Emerging technological advancements in nanotech devices and the rise in the adoption of nanotechnology in medical diagnosis are the two major factors driving the growth of the nanotechnology market. Whereas, the high cost of the technology and problems regarding the deployment of nanotech devices in extreme weather conditions are the factors that restrain the market growth up to a certain extent. However, a surge in government support and funding, and the emergence of self-powered nanotech devices are expected to provide lucrative opportunities in the industry.

The global nanotechnology market is analyzed across various regions such as North America, Europe, Asia-Pacific, and LAMEA. The North America region held the largest revenue share in 2018, contributing to nearly one-third of the total market share. This region is projected to continue its highest position throughout the forecast period. However, the Asia Pacific region would grow at the highest CAGR of 12.80 % from 2015 to 2025.

[Nanotechnology Summit 2020](#) Conference going to be held during November 18-19, 2020 Beijing, China!
